Overview

This document details a revolutionary technology for a decentralized platform regulated by smart contracts. The infrastructure for the Rainbow ecosystem, on all its products and services, is powered by XRB - a proprietary ERC-20 token created and maintained by the Rainbow foundation.

Rainbow Ecosystem Vision

Rainbow XRB provides a powerful crypto wallet service that enables worldwide secure transactions between users, investors & merchant and that will be fully reliable and trustworthy process.

Rainbow XRB vision is to create an authentic and transparent cryptocurrency wallet platform for users and investors.

Crypto Market Challenges

Cryptocurrency is now an essential part of financial markets. Blockchain technology improved day by day and everyone knows it's changing the world. But we need to observe the blockchain-based market because there is some challenge in centralized and decentralized both platforms. We need an essential requirement of trust towards for financial services. Cryptocurrency transaction fees are the other problem for average users. Rainbow Ecosystem completely solves these problems described above by initiate a new platform with custody free, secure and fee-less transactions between rainbow wallet users. Rainbow Wallet is a decentralized framework where users can store their assets with security and privacy. They are always able to make transactions between Rainbow wallet users without any transaction fees.

Solutions By Rainbow XRB

Rainbow Foundation is created to give authentic and transparent service to cryptocurrency users. Rainbow Ecosystem main components is to provides a powerful crypto wallet service that enables worldwide transactions between crypto users. Rainbow wallet allows you to store any crypto assets, manage them in one place by control of private key or seed phrase.

Rainbow wallet allows doing internal transactions between Rainbow wallet without any fees like coinbase. Here people can send their crypto assets without any transaction fees. The rainbow wallet provides a fully secure and transparent service that allows users to store and manage their assets with private keys. There is no control by third parties or the Rainbow team in wallet security. Users are the only owner to manage and control their assets without paying any fees

The Rainbow Ecosystem

Rainbow Ecosystem's main components is Rainbow crypto wallet. There are many crypto wallet services available but Rainbow Foundation try to give fee less crypto wallet service between Rainbow Wallet users. People can easily store their assets in the wallet with a decentralized way and Rainbow wallet users will be able to send their assets without any transaction fees between Rainbow wallet users.

Rainbow Token (XRB) is another component of the Rainbow Ecosystem. XRB will be used as fuel in Rainbow Ecosystem. Rainbow Token is an Ethereum Blockchain-based Token.

THE RAINBOW ECOSYSTEM HAS TWO COMPONENTS

RAINBOW CRYPTO WALLET is a decentralized universal wallet platform that allowing store crypto assets with high security. Rainbow wallet users can make internal transaction without any fees.

RAINBOW TOKEN (XRB) is native token of Rainbow, XRB will be use as fuel in Rainbow Ecosystem. Rainbow XRB use cases to reward community and value creation for Rainbow platform.

Rainbow Crypto Wallet

Rainbow crypto wallet is the main focus in Rainbow Ecosystem, Which allows users to store their crypto assets in a decentralized way and manage their assets easily. The rainbow wallet allows users to view, send or receive any supported crypto assets.

Wallet will be fully secured by private key and completely user-based no chance for locks or suspended. No one can access funds or assets without real user authorizations. Rainbow crypto wallet is a fully decentralized platform so there have privacy and security. Rainbow Wallet will be released in the mobile version so users have Access to use their wallet easily. Our goal is to create a secure and easy user interface based crypto wallet where people can make a transaction without any transaction fees between rainbow wallet users.

Rainbow Token (XRB)

Rainbow Token (XRB) is the native token of Rainbow Foundation. Rainbow XRB will be use as fuel in Rainbow Ecosystem. XRB use cases to reward community and value creation for Rainbow Ecosystem. Rainbow Token (XRB) is an Ethereum Blockchain based Token.

Token Name: **RAINBOW**

Token Symbol: **XRB**

Token Decimal : **8**

Total Supply: **6 MILLION**

Rainbow Asset management

Rainbow Ecosystem's main components is Rainbow crypto wallet. There are many crypto wallet services available but Rainbow Foundation try to give fee less crypto wallet service between Rainbow Wallet users. People can easily store their assets in the wallet with a decentralized way and Rainbow wallet users will be able to send their assets without any transaction fees between Rainbow wallet users.

- Send or Receive crypto assets in Rainbow Wallet
- Import wallet by using private key or seed phrase
- Send assets easily to any others address
- Make transaction without fees between Rainbow wallet
- Store private keys and seed phrase in a safe environment
- Use as Dapp browser for decentralized transaction

Token Distribution

- 40% ■ Token Sale & IEO
- 20% ■ Marketing & Partner
- 15% ■ Development Process
- 15% ■ Airdrop & Bounty
- 10% ■ Core Team

Rainbow Token Roadmap

Q4 2019

- Conception of idea
- Token create and verified
- Beta version of website release
- Whitepaper version 1.0 published
- First phase airdrop Start

Q1 2020

- Full website rollout
- List on First Exchange
- Airdrop Distribution

Q2 2020

- Rainbow wallet development Start
- App Beta Testing
- IEO On Exchange
- Airdrop Phase 2

Q3 2020

- Airdrop Phase 2 Distribution
- Rainbow wallet Release
- Top 20 Exchange Listing
- Payment Gateway Framework
- More on whitepaper version 1.1
